## DETAILED ACTION

### *Drawings*

1. The drawings are objected to because it is unclear what is the stopper mechanism 4. It would appear that the protrusions 7a are the means for stopping the anchor section and hence would be the stopper mechanism (page 8, lines 7-14). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said cross position" in line 7. There is insufficient antecedent basis for this limitation in the claim.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Grey (3946636).

Grey's board anchor (10, 16) has a screw shaft 10 with a longitudinal axis and a freely rotating anchor section 16 attached to it. Anchor section 16 also includes a stop attachment in the form of a leaf spring (col. 2, l. 10) that repositions the anchor section from a position parallel to the screw shaft to a position perpendicular to the screw shaft. It is considered that the stop attachment of applicant's is the same as the stopper mechanism. Therefore, Grey is considered to have a stopper mechanism since he has a stop attachment. An attachment ring 20 is mounted on the screw shaft. Hole 26 in the anchor section is adapted to fit the screw shaft.

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited further to show the state of the art with respect to board anchors in general:

U.S. Pat. No. 5209621 to Burbidge, U.S. Pat. No. 3302508 to Topf, U.S. Pat. No. 2144895 to Place.
